10 Big Question: How did life evolve on Earth?

The Great Fossil Hunters

Have you ever wondered what it might be like to be a fossil hunter? How would you go about excavating and preparing a fossil without damaging it? How would you figure out what the fossil used to be? How is a fossil formed?

In this hands-on activity, the Eden Project shows how you can create your own fossils encased within a sedimentary rock and what happens when it comes to excavating and identifying the fossil inside.
